**DESCRIPTORS** Conservation Education; \*Elementary Education; \*Environmental Education; \*Instructional Materials; Interdisciplinary Approach; Learning Activities; Natural Resources; Outdoor Education; \*Physical Education; Science Education; \*Teaching Guides

**IDENTIFIERS** Elementary Secondary Education Act Title III; ESEA Title III; Instruction Curriculum Environment; \*Project I C E

**ABSTRACT**

This physical education guide, for use in grades K 6, is one of a series of guides, K-12, that were developed by teachers to help introduce environmental education into the total curriculum. The guides are supplementary in design, containing a series of episodes (minilessons) that focus on the growth of both mind and body, and the work these two must do to protect the environment. The episodes are built around 12 major environmental concepts that form a framework for each grade or subject area, as well as for the entire K-12 program. Although the same concepts are used throughout the K-12 program, emphasis is placed on different aspects of each concept at different grade levels or in different subject areas. This guide focuses on aspects such as tumbling, dance, and cycling. The 12 concepts are covered in one of the episodes contained in the guide. Further, each episode offers subject area integration, subject area activities, interdisciplinary activities, cognitive and affective behavioral objectives, and suggested references and resource materials useful to teachers and students. # FORWARD TO PROJECT I-C-E ENVIRONMENTAL EDUCATION GUIDES

In 1969, the First Environmental Quality Education Act was proposed in the United States Congress. At the time of the introduction of that legislation, I stated:

"There is a dire need to improve the understanding by Americans of the ominous deterioration of the Nation's environment and the increasing threat of irreversible ecological catastrophe. We must all become stewards for the preservation of life on our resource-deficient planet."

In the three years since the Environmental Education Act was passed by the Congress, much has happened in the United States to reinforce the great need for effective environmental education for the Nation's young people. The intensive concern over adequate energy resources, the continuing degradation of our air and water, and the discussion over the economic costs of the war against pollution have all brought the question of the environmental quality of this nation to a concern not merely of aesthetics but of the survival of the human race.

The intense interest by the public in the quality of our lives

as affected by the environment clearly indicates that we cannot just use incentives and prescriptions to industry and other sources of pollution. That is necessary, but not sufficient." The race between education and catastrophe can be won by education if we marshal our resources in a systematic manner and squarely confront the long-term approach to saving our environment through the process of education.

As the incessant conqueror of nature, we must reexamine our place and role. Our world is no longer an endless frontier. We constantly are feeling the backlash from many of our ill-conceived efforts to achieve progress.

Rachel Carson's theme of "reverence for life" is becoming less mystical and of more substance as our eyes are opened to much of the havoc we have wrought under the guise of progress. A strong commitment to an all-embracing program of environmental education will help us to find that new working definition of progress that is a pre-requisite to the continued presence of life on this planet.

- Senator Gaylord Nelson

## PREFACE

Educational research indicates a direct relationship between physical fitness and environmental education. Physical education contributes to the total growth and development of the child.

A good integrated program is activities by the beliefs:

1. That a liberal education in coordinating school, home and community to progressively bring the child from where he is to where he ought to be a member of a democratic society.
  2. That there must be a new emphasis placed on the integration of physical fitness and environmental education based upon a feeling of responsibility to our posterity.
- The children's needs and society's needs now demand growth in body and mind to protect the environment for tomorrow.

**ACKNOWLEDGEMENT**

The interest and dedicated effort of the following teachers from Wisconsin Area "B" has led to the development of the Project I-C-E Environmental Education K-12 series:

D. C. Aderhold, Bonduel	John Cowling, Niagara	Robert Haen, Luxemburg-Casco

## DIRECTIONS FOR USING THIS GUIDE

This guide contains a series of episodes (mini-lesson plans), each containing a number of suggested in and out of class learning activities. The episodes are built around 12 major environmental concepts that form a framework for each grade or subject area, as well as for the entire K-12 program. Further, each episode offers subject area integration, multidisciplinary activities, where applicable, both cognitive and affective behavioral objectives and suggested reference and resource materials useful to the teacher and students.

1. This I-C-E guide is supplementary in design--it is not a complete course of study, nor is its arrangement sequential. You can teach environmentally within the context of your course of study or units by integrating the many ideas and activities suggested.
2. The suggested learning activities are departures from regular text or curriculum programs, while providing for skill development.

3. You decide when any concepts, objectives, activities and resources can conveniently be included in your unit.

4. All episodes can be adapted, modified, or expanded thereby providing great flexibility for any teaching situation.

5. While each grade level or subject area has its own topic or unit emphasis, inter-grade coordination or subject area articulation to avoid duplication and overlap is highly recommended for any school or district seeking effective implementation.

This total K-12 environmental education series is the product of 235 classroom teachers from Northeastern Wisconsin. They created, used, revised and edited these guides over a period of four years. To this first step in the 1,000 mile journey of human survival, we invite you to take the second step--by using this guide and by adding your own inspirations along the way.

## PROJECT I-C-E TWELVE MAJOR ENVIRONMENTAL CONCEPTS

1. The sun is the basic source of energy on earth. Transformation of sun energy to other energy forms (often begun by plant photosynthesis) provides food, fuel and power for life systems and machines.
2. All living organisms interact among themselves and their environment, forming an intricate unit called an ecosystem.
3. Environmental factors are limiting on the numbers of organisms living within their influence. Thus, each ecosystem has a carrying capacity.
4. An adequate supply of clean water is essential to life.
5. An adequate supply of clean air is essential for life.
6. The distribution of natural resources and the interaction of physical environmental factors greatly affect the quality of life.
7. Factors such as facilitating transportation, economic conditions, population growth and increased leisure time influence changes in land use and population densities.
8. Cultural, economic, social, and political factors determine man's values and attitudes toward his environment.
9. Man has the ability to manage, manipulate and change his environment.
10. Short-term economic gains may produce long-term environmental losses.
11. Individual acts, duplicated or compounded, produce significant environmental alterations over time.
12. Each person must exercise stewardship of the earth for the benefit of mankind.

A "Concept Rationale" booklet and a slide/tape program "Man Needs His Environment" are available from the I-C-E RMC to more fully explain these concepts.

# TABLE OF CONTENTS

Concept	Topic	Grade Level	Page No.
1	Rhythmic Activities-Energy	K-1	7

Environmental:

Integrated with:

CONCEPT NO. 1 - Energy

SUBJECT Physical Education, Science

ORIENTATION Sun Energy

TOPIC/UNIT Rhythmic Activities-Energy (K-1)

BEHAVIORAL OBJECTIVES

STUDENT-CENTERED LEARNING ACTIVITIES

Cognitive:

Performance of activities that a relationship will be shown as to how we depend on the sun through the plants we eat.

In-Class:

Outside or Community:

A.

Teacher creates atmosphere through questioning the students about early morning atmosphere of the sun.

I. Science

A. Bring seeds to plant.  
1. Observe growth.  
B. Bring various samples of food for children to taste.

1. What do we see in the morning?

1. Discuss the source of energy to produce these foods.

2. What does it do?

3. Does it help us?

4. How does it help us?

B.

With background music, children will show with their bodies how the sun rises.

C.

Mulberry Bush record. Change the words.

1. This is the way we rake the land...

2. Plant the seed...

3. Water the seed...

4. Now let sun come down...

5. This is the way we hoe the weeds...

6. Now water the plant to make it grow...

7. Now smell the flowers sweet perfume...

8. Now take a bite of the juicy fruit...

9. Mmm, just taste how good it is...

So early in the morning. (Continued)

Affective:

Enthusiasm will be shown in physical activities and discussion.

Skills Used:

1. Non-locomotor movements (sun).
2. Kinesthetic sense of the maximum range of body movements (Ex. smallest to the largest, lowest to the highest)

(Continued)

ORIENTATION Safety and Conservation

TOPIC/UNIT Dramatic Play (K-1)

BEHAVIORAL OBJECTIVES		STUDENT-CENTERED LEARNING ACTIVITIES	
<b>Cognitive:</b> Imagination of hiking experience which stresses safety and conservation will aid student in a better way of adjustment to our environment.	<b>In-Class:</b>  A. Stressing safety and conservation, the teacher can lead the children to imagine themselves going on a hike to enjoy nature. Then she can direct them in this problem. 1. Let's pretend that we are going on a hike. What are some things we need to take with us? 2. Now that we have gathered all our materials, let's roll our packs into a nice neat bundle in this manner: a. Put down your tarp. b. Arrange your blankets. c. Put the rest of your things in. d. Roll the pack and tie it up. 3. Off we go...(Imitate walking through the woods, each child in his own way, over a rock, jump a creek, etc.)  (Continued)	<b>Outside or Community:</b>  A. Have a boy scout or scout master speak on safety in the woods. 1. Safety for the camper or hiker. 2. Safety for the natural environment-- how to preserve it and respect for private property. B. Have a forest ranger speak about fire safety. C. Have the children bring articles they would take with them on a hike, and demonstrate how to pack them and use them properly.	
<b>Affective:</b> Investigation of further safety precautions which are necessary for outdoor living and conservation of natural resources.			
<b>Skills Used:</b> 1. Outdoor living. 2. Locomotor skills. 3. Creative dramatics.

## CONTINUED OR ADDED LEARNING ACTIVITIES

CLASSROOM (Continued)PICK THE PUMPKIN PATCH

Equipment: Four 7" playballs or rhythm balls.  
Designate the playing space. Four children are selected to be the Pumpkin Pickers. They put on a red pinnie, take a ball and go stand in the center of the playing area. The other children are pumpkins and scatter about the space. On the signal "Pick the Pumpkin Patch", the pickers chase after the pumpkins, throwing their balls at them in an attempt to eliminate them from the game by hitting them below the head. The pumpkins may dodge anywhere within the designated boundaries. If they are hit, they go sit down in the pantry (where they will be made into pie). They are eliminated from the game. After a designated time, 3-4 minutes, the Pickers count the number of pumpkins they have picked (hit). They choose a pumpkin still in the patch to take their place. Those pumpkins who were eliminated may now re-enter the game. See which group of pickers can pick the most pumpkins.

Suggestions:

1. Make the pumpkin patch very large, so the children get a good run. This is a good game for a cooler day out of doors as most of the children are active for the greater share of the playing period.
2. When choosing children to be the first pickers, try to select those who are not chosen often by the other children. You might want the girls to choose girls to take their place and boys to choose boys. In this way, the throwers will be divided between boys and girls.

BEHAVIORAL OBJECTIVES	STUDENT-CENTERED LEARNING ACTIVITIES	
Cognitive:	In-Class:	Outside or Community:
Imitating movements of four animals--inchworm, crab, cricket and frog--to prove dependency on environment.	<p>I. Physical Education</p> <p>A. Question the children about the ways animals move.</p> <p>B. Direct them to try and move like:</p> <p>1. An inchworm:</p> <ul style="list-style-type: none"> <li>-bend over until your hands touch the floor in front of you.</li> <li>-rest on your hands and feet.</li> <li>-slowly bring your feet up as close as you can to your hands.</li> <li>-inch your hands forward.</li> </ul> <p>2. A crab:</p> <ul style="list-style-type: none"> <li>-squat down and reach back, putting both hands on the floor without sitting down.</li> <li>-keeping your body stiff and in a straight line, walk forward, backward and sideways.</li> </ul>	<p>I. Science</p> <p>A. Bring a crab, frog or cricket to school. Observe it in action.</p> <p>B. Choose one of the above animals and read as much as you can about it. Report on its movements.</p> <p>C. Take a nature walk to a creek to observe frogs and crabs in action.</p>
Affective: Investigate how differently animals move and why. Then can experiment with new locomotor movements.		
Skills Used: 1. Locomotor skills in bending and squatting positions. 2. Large muscle movement. 3. Small muscle movement. 4. Body balance.

A cricket:</p> <ul style="list-style-type: none"> <li>- squat and spread your knees.</li> <li>- put your arms between your knees.</li> <li>- grasp the outside of your ankles with your hands.</li> </ul> <p>4. A frog:</p> <ul style="list-style-type: none"> <li>- squat down with your hands placed on the floor slightly in front of your feet.</li> <li>- jump forward a few feet lighting on your hands and feet at the same time.</li> </ul> <p>5. A grasshopper:</p> <ul style="list-style-type: none"> <li>- sit down on floor, legs extended.</li> <li>- pick up body with hands and move forward using feet as a lever.</li> </ul>

Environmental:		Integrated with:	
CONCEPT NO.	2 - Ecosystem	SUBJECT	Physical Education, Science
ORIENTATION	Food Chain	TOPIC/UNIT	Singing Games, Field Trip (1-2)
BEHAVIORAL OBJECTIVES		STUDENT-CENTERED LEARNING ACTIVITIES	
Cognitive: Identifying several food chains and comparison of food requirements of animals to get food and defending themselves.		In-Class:	Outside or Community:
Affective: Continuing of investigation of the life cycle of several kinds of animals and their environment.		I. Physical Education A. Using the old familiar song, <u>Farmer in the Dell</u> , the students may enjoy changing the words to show various food chain relationships. Be sure to explain each term used. Example: 1. The clever little fox, The clever little fox, Heigh-o the dairy-o! The clever little fox. 2. The fox takes the mouse... 3. The mouse takes the seed... 4. The seed takes the soil... 5. The soil takes the stump... 6. The stump takes the toadstool... 7. The toadstool takes the slug... (Continued)	I. Science A. Correlate with the classroom teacher: 1. Take a field trip to a local nature center, marsh, pond, creek or zoo. 2. Study backyard creatures in school or nearby park. (Use magnifying glass, if possible.) 3. Assemble various food chains in correlated science unit. B. Librarian brings in displays, pupils act out or depict how animals live in their own habitat. 1. Is their habitat being destroyed? 2. How can this be prevented?
Skills Used: 1. Locomotor movements in rhythm. 2. Identification of food chain relationships.

ORIENTATION Cultural Influence

TOPIC/UNIT Musical Games (1-2)

## BEHAVIORAL OBJECTIVES

## STUDENT-CENTERED LEARNING ACTIVITIES

## Cognitive:

Performance of activities will show identification of musical games integrated with environment.

## In-Class:

## Outside or Community:

A. Discussion of how people live all over the world (cultural influence).

1. Do all of us live

and eat the same things and the same way?

2. Do the people in Alaska live differently than people in Florida?

3. What does culture mean?

4. Do we have a culture in this community?

5. Is our culture a combination of many cultures?

6. Does our culture influence the way we dance?

B. Bring out the fact that different people dance in a different way--we benefit from them by sharing them today. Teacher should choose a dance common to the region they are in. Following are cultural games and dances to choose from:

## Affective:

Positive cultural activities that have been enjoyed previous to pollution.

## Skills Used:

1. Timing movements to music.
2. Rhythm.
3. Skipping.
4. Shoemaker Dance actions.
5. Forming a circle.

SUBJECT Physical Education

ORIENTATION Limits are set on the number of organisms in a place

TOPIC/UNIT Competitive Games (2)

BEHAVIORAL OBJECTIVES

STUDENT-CENTERED LEARNING ACTIVITIES

Cognitive:

Given conditions to limit performance will force adaptation to activities to specific conditions.

In-Class:

Outside or Community:

A. Teacher explain that we are going to play a balgame today. The name of the game is Dodge Ball. While some of us try to tag others with the ball, the others must try to keep away from the ball.

A. Take all the children into a small room which will be overcrowded. After a few minutes ask them how they feel in this space. Also ask why.

B. You will need two groups taggers and dodgers. The "taggers" form a circle inside which the "dodgers" stand loosely around. The "taggers" continuously keep throwing the ball at the "dodgers", keeping it below waist level to avoid accidents. The "dodgers" keep trying to avoid the ball and must join the circle of "taggers" if the ball so much as touches them.

B. Take the children to a large room, a dining hall, gymnasium, church, etc. After a while ask how this space makes them feel and why.

Affective:

Continuation of exploring space to limitations.

Skills Used:

1. Quick body movement to develop eye/hand/feet coordination.
2. Methods of adapting to environmental circumstances.

C.

1. Boys be dodgers.
  2. Girls be dodgers.
  3. Those wearing red.
  4. Those wearing blue.
- Vary the grouping after each game:

ORIENTATION Pure Water

TOPIC/UNIT Games, Pollution (2-3)

BEHAVIORAL OBJECTIVES

STUDENT-CENTERED LEARNING ACTIVITIES

Cognitive:

Playing first phase of activity, they will be able to add additional polluters.

In-Class:

Outside or Community:

A. Uncle Sam Game.

1. Divide the play area by two goals. Children are divided into polluters. One child is selected as selected as Uncle Sam. He stands in the middle. Children call "Uncle Sam, Uncle Sam, may we cross your polluted dam?" Uncle Sam replies, "Yes, you may if you are a coke bottle". They get a free run across. Those not mentioned remain on the line until Uncle Sam calls "go". They must cross the opposite end without being caught. If caught, he goes to the sideline; after 3 turns, Uncle Sam chooses someone who is not caught to take his place. (Boys pick girls and reverse.)

A. Possible correlation with classroom teacher's scheduled visit to a polluted stream.

B. Collect three samples of water. Check with microscope for the impurities of each sample.

Affective:

Awareness of different items that may pollute a stream and appreciation of a clean stream.

Skills Used:

1. Running.
2. Fairness in play.
3. Tagging.
4. Dodging.

We are marching for Ecology, Ecology, Ecology,  
We are marching for Ecology, Ecology, Hurrah.

P-O-L-L-U-T-I-O-N

Pollution is a dirty word  
But it's not hard to spell;

Just practice with the syllables  
Until you know it well

Pol - lu - and then t i o n.  
Pollution, pollution -

Let's spell it once again.  
P - O - L - L - U - T - I - O - N

E-C-O-L-O-G-Y

E - C - O - L - O - G - Y  
You can spell it if you try.

You can understand it, too,  
And then you'll make it work for you.

It isn't luck, it isn't fate -

It's just that all things must relate.  
Weather, wildlife, water, woods -

When they balance, life is good.

I see paper, I see trash,  
I see someone's foolishness.

Fire, fire, fire alarm  
A spark fell into a farmer's yard,

How many animals did it harm?

Papers, bottles, tires and cans  
Tell me pollution is caused by man

Fight, fight, fight, fight, pollution.

Campfire, campfire, burn so bright  
Campfire, campfire, give us light  
Campfire, campfire, what a beautiful night.  
Holy smoke! The campfire got away tonight  
How many trees did it burn down?

#### B. Individual rope skills.

1. Turn rope forward.
  - a. Jump on toes of both feet.
  - b. Jump on right foot.
  - c. Jump on left foot.
  - d. Jump first on right foot, then on left.
  - e. Progress forward in a run.
  - f. Progress forward in a skip.
  - g. On the odd count, ordinary jump; on the even count, cross hands in front of body making a loop through which the child jumps.
  - h. Hold one leg high, knee straight, toes pointed, jump on other foot.
  - i. Throw raised leg forward on one jump and backward on the next.
  - j. Jump with feet spread sideward.
  - k. Jump with feet spread sideward and backward.
  - l. Rocker, leap forward on one foot, leap backward onto other foot.
  - m. Double jump forward--two jumps to each turn of the rope.
  - n. Jump and land with the feet crossed, alternating the position of feet on each jump.
  - o. Click heels together while in air.
  - p. Turn rope twice while in air.
  - q. Move sideward right or left on each jump.
2. Turn rope backward doing the above.
3. Click handles of rope together or clap hands each time rope is jumped.
4. Cradling - swing the rope forward under the feet.

Partners stand side by side, inside hands joined, outside hands turning the ropes.</li> <li>6. No. 1 turns rope forward, No. 2 runs in, faces No. 1 and executes quarter, half and full turns on each jump.</li> </ol> </li> </ol>

Environmental:		Integrated with:	
CONCEPT NO.	10 - Economic Planning	SUBJECT	Physical Education, Art
ORIENTATION	Poor Posture	TOPIC/UNIT	Posture, Safety (Art) (4-5)
BEHAVIORAL OBJECTIVES		STUDENT-CENTERED LEARNING ACTIVITIES	
Cognitive:		In-Class:	Outside or Community:
Differentiate between the terms, short-term gains and long-term gains. Will be very effective as to what happens due to oversight in caring for our environment.		I. Physical Education A. Motivation. 1. Offer a child a bag of candy. 2. Class discussion of short-term vs. long-term gains. a. What if a child eats the whole bag in one sitting? b. What alternatives are there besides eating the whole bag at once?	I. Art A. Art project illustrating safety in caring for campfires and carelessness of tourists.
Affective:			
Awareness will be shown through consequences resulting from poor posture habits.			
Skills Used:			
1. Posture correctness. 2. Stoopng, bending and body balance.		<p>B. Posture pictures should be posted. Give demonstrations of short-term gains resulting in poor posture. Ex.-lifting, bending vs. stooping, carrying groceries, one large sack vs. two small sacks. Sitting at desk, slouched vs. good posture.</p> <p>C. Tie in environmental loss resulting from short-term gains. (Continued)</p>	

**CONTINUED OR ADDED LEARNING ACTIVITIES**

**Publications:**

Good and poor posture pictures  
from magazines

**CLASSROOM (Continued)**

- 1. Campfires and cigarettes (forest fires).
  - 2. Economic gains of industry (pollution of air and water).
  - 3. Lack of crop rotation (depleted soil).
  - 4. Economic gains in wood industry (disappearing forests).
- D. Exercises:
- 1. Sitting back to back with a partner, by pushing against each other, stand up. (called Chinese get up).
  - 2. Standing against the wall with heels, buttocks, shoulders and head, only the fingers of the hand should fit between the lower back and wall.
  - 3. Shoulders should be back and down with the stomach pulled in with the limitations discussed in No. 2.
- E. Health.
- 1. Effect of being healthy.
    - a. Proper diet.
    - b. Emotions.

ORIENTATION Respecting Property Rights

TOPIC/JUNIT Volleyball and Leadup Games (4-5)

BEHAVIORAL OBJECTIVES

STUDENT-CENTERED LEARNING ACTIVITIES

Cognitive:

Completing leadup games and discussion, children will be able to list reasons why they should respect other people's property.

In-Class:

Outside or Community:

Affective:  
Respecting the property and rights of other people.

- |  |  |
|--|--|
| <p>A. Leadup volleyball (4th grade)</p> <ol style="list-style-type: none"> <li>1. With a volleyball court setup, the students should be assigned to a space.</li> <li>2. Once a space is assigned the students will play catch over the net without dropping the ball.</li> <li>3. After success in #2, have children pass the ball three times on a side with the last pass being to the line nearest the net.</li> </ol> | <p>A. Have a park manager relate the expense involved in repairing defaced facilities. State also why people should respect areas designated for swimming, picnicking and camping.</p> <p>B. Have janitor talk to class pointing out the expense of repairing damage done during the year.</p> |
|--|--|

- Skills Used:
1. Catching and throwing.
  2. Playing a position.
  3. Volleying.
  4. Cooperation.

- B. 5th grade  
Same as above only use a volley (fingertips) instead of pass.
  - C. 6th grade  
Play the game of volleyball stressing playing their own space.
- Note: Level of play depends on skill level of student.
- D. Activities.
1. Newcomb.
  2. Poison Apple.
- (Continued)

SUBJECT Physical Education

ORIENTATION Cultural Influences

TOPIC/UNIT Dance (5)

BEHAVIORAL OBJECTIVES

STUDENT-CENTERED LEARNING ACTIVITIES

Cognitive:

Performing dances of other countries to depict culture.

In-Class:

Outside or Community:

Affective:  
Awareness of influences of other cultures and our society.

A. Seven jumps (Danish). This is a Danish group or couple dance. Any number of people may participate in the dance/game. Notice that the sustained notes are of varying duration to cause teasing suspense, since dancers must hold position for the duration of the note.

A. Have a local dance group come in to give a demonstration.  
B. Have students look for other hints of cultural influence. Example: names, types of food served, etc.

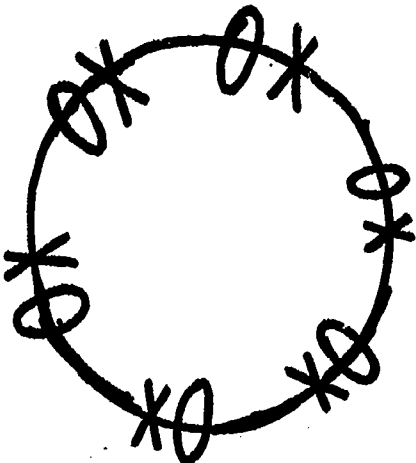

Opening formation: Single circle, all hands joined. Left foot free. Chorus: The chorus consists of 8 step hops to the left, 3 stamps to turn around and then repeat to the right. Step hop by stepping, then hopping on one foot as the opposite leg swings forward.

Dance:

- Skills Used:
1. Step hopping.
  2. Listening for rhythm cues.
  3. Elbow swing.
  4. Do-si-do.
  5. Sashay.
  6. Cast off.

I. Right foot--on sustained note, place hands on hips and raise right knee. Do not lower knee until the second note and stand

# CONTINUED OR ADDED LEARNING ACTIVITIES

## CLASSROOM (Continued)

B. Virginia Reel (American square dance).

Opening Formation: Two lines facing each other--4-6 couples, girls on one side, boys the other. Right foot free.

Dance: Prompter's cue.

1. Forward and back.
2. Right elbow round.
3. Left elbow round.
4. Both hands round.
5. Do-si-do right shoulder.
6. Do-si-do left shoulder.
7. First couple down you go.
8. And back.
9. Right elbow hook, all the way.
10. Left to next, keep moving down.
11. Head couples sashay back.
12. Cast off.
13. Make the arch.

Foot

HEAD

## Explanations:

1. Partners walk 3 steps toward each other, bow and curtsey and return. Forward and bow.
2. Partners walk toward each other, take right elbows, pass around and return. Right elbow swing.
3. Partners walk toward each other, take left elbows, pass around and return. Left elbow swing.
4. Partners walk toward each other, take both hands, pass around and return. Both hands circle.
5. Partners walk toward each other, passing right shoulders and return. Do-si-do right shoulder.
6. Partners walk toward each other, passing left shoulders and return. Do-si-do left shoulder.
7. First couple join hands and slide down to foot of lines.
8. First couple return to head of lines. Sashay down and back.

ORIENTATION National Parks

TOPIC/UNIT Jogging (6)

BEHAVIORAL OBJECTIVES

STUDENT-CENTERED LEARNING ACTIVITIES

Cognitive:

Showing on a map three locations of national parks will initiate interest of community.

In-Class:

Outside or Community:

Affective:  
Participation of community projects show enthusiasm.

A. Prepared before class.

A. Contact an individual who has toured a foreign country to talk on natural resources of his trip; usually slides are available.

1. Teacher will prepare tagboard cutouts of the national parks. Their size and shape will be as comparable as possible.

who has toured a foreign country to talk on natural resources of his trip; usually slides are available.

2. These national park cutouts will be spread out in appropriate positions around the gym.

3. Students will be told directions as to north, south, east, west and tagboard cutouts of parks placed in correct position.

B. On the opposite side of the tagboard, the teacher should have the name of the national park, ex.-Yellowstone, located in Wyoming, Montana, Idaho, size--2.2 million acres.

Skills Used:  
1. Physical fitness through jogging.  
2. location of where the national parks are.

Describe basic environment: rugged mountains, heavily forested, geysers and hot springs,

CONCEPT NO. 12 - Stewardship

SUBJECT Physical Education

ORIENTATION Respecting property rights

TOPIC/UNIT Volleyball and Leadup Games (6)

BEHAVIORAL OBJECTIVES	STUDENT-CENTERED LEARNING ACTIVITIES	
<p><b>Cognitive:</b> Completion of leadup games and regulation games, pupils will discuss and list reasons why they should respect other people's property.</p> <p><b>Affective:</b> Showing respect for other people and their property would be shown by the participating students.</p> <p><b>Skills Used:</b> 1. Catching and throwing. 2. Playing a position. 3. Volleying. 4. Cooperation. 5. Serving.</p>	<p><b>In-Class:</b></p> <p>A. Volleyball. 1. Assign each player to a space. Stress playing on position. Note: Level of play depends on skill level of students. B. Discussion, student-centered, teacher-directed. 1. Why must we play our own space? 2. What would happen if we went all over the court? 3. Can we say that this space is a private piece of land? 4. What about private property--should we trespass? 5. What about other people's property--should we mark on it or destroy it? 6. When we go to a park, how should we leave it?</p>	<p><b>Outside or Community:</b></p> <p>A. Have a park manager relate the expense involved in repairing defaced facilities. State also why people should respect areas designated for swimming, picnicking and camping. B. Have janitor talk to class pointing out the expense of repairing damage done during the year.</p>
